

STERN JAWS PINBALL LIGHT BAFFLE SET

Thank you for purchasing my Stern Jaws light baffle kit. This kit is designed to work with your machine without any un-reversible modifications so at any time you can revert back to a factory layout if you wish.

Installation is easy and all you need is some time and a 1/4" nut driver. All existing fasteners are reused and nothing new is required. Open your kit and group like parts together. You will have the following

After Grouping the items refer to the back of this page to see the locations of each baffle. Simply unscrew the existing fastener and install the baffle. **Do not overtighten** the fasteners when reinstalling LED board screws.
